

Task 1

Try to make oData request to this service <https://services.odata.org/V4/TripPinServiceRW> by jQuery library:

- make one request for each of query string parameter (\$count,\$expand, \$orderby, \$search, \$select, \$skip, \$top,\$filter);
- make one request with combination of 3 filters;
- make one request with combination of 3 string parameter;
- display all results as a table.

Task 2

Try to implement first 19 step (before data binding) of this tutorial :
