Assisting Companies Leverage Investments in SAP Solutions

Homework Lection 1

TODO

◆ Create index.html which should consist of image (800px), div with text(800px), list of item parameters and link to items.html

◆ Create items.html which should consist of table with next content:
   -title
   -header row with 6 cell (4th cell span two ordinary cell, something like size) - item parameters
   -10 data row with 5 data cell (4th and 5th cell like width height), 6th and 7th cells like a button ('change' and 'delete') - parameters value

◆ Create item.html which should consist of form to create/change new item (you don't need to fill the form, only create).

◆ Read this article (https://proglib.io/p/git-for-half-an-hour/), try to create your own GIT repo, github account, connect it and push your homework
